OSMIA

Privacy first. Performance guaranteed.

We're an independent organisation committed to protecting what matters most to you.

About Osmia

With Osmia, your privacy and intellectual property are always protected. Our mission is simple: to guarantee business continuity and resilience with cutting-edge cyber security and cloud solutions.

We specialise in industries where confidentiality, security and high-performance systems aren't optional – they're essential.

Privacy

At Osmia, we believe everyone has the right to privacy. We operate with the highest standards, ensuring your data is protected with uncompromising confidentiality.

Independence

As sole owners and operators of our facilities, we don't sub-lease from hosting providers. Rather than outsourcing, we empower and invest in our own industry leading workforce.

Support

Years of operating in our clients' industries have equipped us with a deep technical understanding, enabling us to meet the unique challenges of your business.

High Performance

Osmia's commitment to excellence shines through in our meticulous attention to detail and drive for continuous improvement, ensuring high-performance systems that evolve with you.

What we do

As an independent organisation, we take a holistic view of your business, offering custom-fit solutions that provide end-to-end security for your infrastructure and data.

- Network Services
- Private Physical Servers

Experience the power of
total protection

Whether you need a one-time assessment or continuous monitoring, we've got you covered.

Osmia's experts craft custom protection strategies, keeping your systems secure without compromising your growth.

Layered Security

Our expert team builds robust, multi-layered defence systems to stop threats in their tracks. From network segmentation to data encryption and endpoint protection, we handle it all.

Comprehensive, adaptive security measures reduce vulnerabilities, while built-in redundancy ensures no single failure will take you down.

And with 24/7 monitoring and rapid incident response, threats will be detected and neutralised before they have a chance to escalate.

People-Centric Security Services

Turn your team into a security asset with our people-centric services, focused on educating and safeguarding against the latest cyber threats.

Tailored security awareness training, phishing simulations, data loss prevention and more will help your organisation minimise human error and foster a powerful culture of security and vigilance.

Our adaptive approach recognises and responds to the dynamic nature of human behaviour, modifying protections to keep you ahead of the game.

Compliance Security Services

Our comprehensive audits, tailored policies and proactive risk management ensure your organisation is prepared to meet the highest regulatory, legal and industry standards, from GDPR and HIPAA to PCI-DSS and SOC 2.
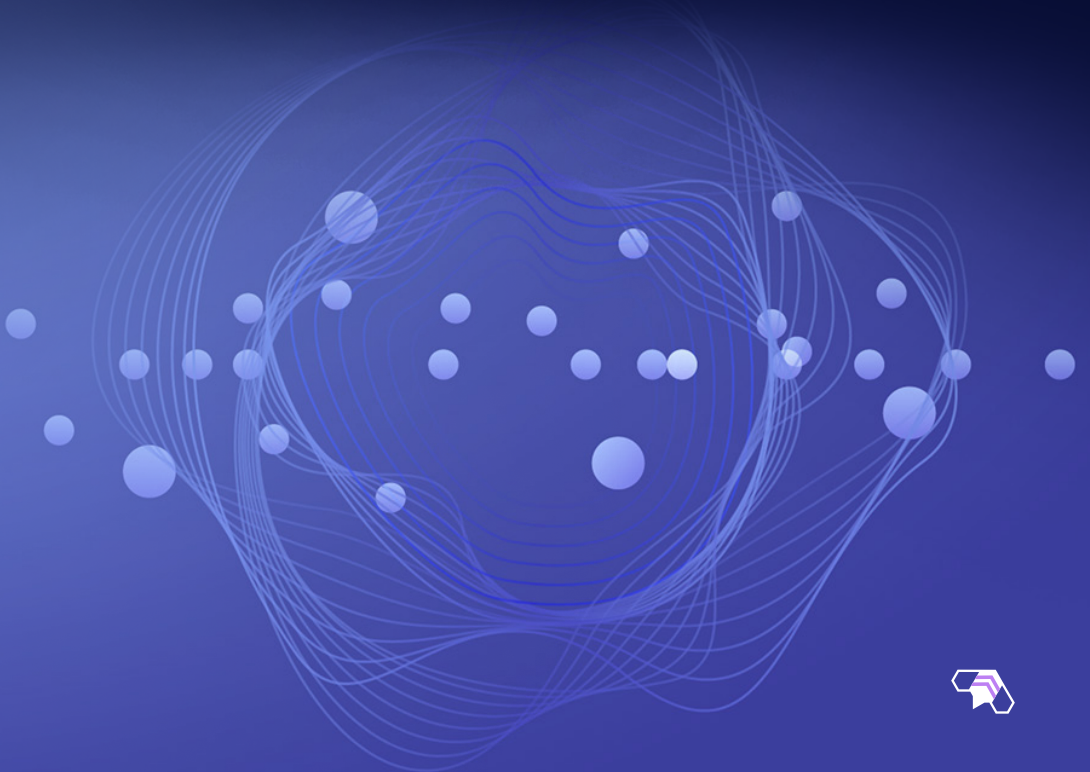

We're on hand to help you maintain continuous compliance, providing practical recommendations to reduce breaches, enhance your competitive edge and strengthen your reputation. Experience the gold standard of regulatory securit

OSINT

Our Open-Source Intelligence (OSINT) services gather and analyse information from websites, forums, news outlets, social media and databases to pinpoint vulnerabilities, tackle threats, support swift incident response and help you stay ahead of the competition.

With comprehensive, cost-effective intelligence, Osmia empowers you to make smarter, safer decisions – every time. Real-time monitoring and proactive defence fortify your posture, keeping you agile, competitive and totally secure.

It's time to upgrade your IT operations

Unlock peak efficiency with Osmia's managed services. Experience seamless operations, streamlined IT and enhanced security.

Our team handles the tech so you can concentrate on what you do best.

Cloud Services

Our expert team manages your entire cloud environment – public, private and hybrid – optimising performance, scalability and security.

Seamless cloud migration minimises downtime and risk, while proactive maintenance and support keeps your systems running flawlessly. With robust disaster recovery and backup solutions, your data stays protected and recoverable.

Focus on innovation while Osmia handles the details, ensuring your cloud works as hard as you do.

Data Protection Services

Our advanced encryption, robust access controls and top-tier backup and recovery solutions, including Disaster Recovery as a Service (DRaaS), deliver unmatched protection.

Our powerful protection frameworks mitigate the risk of breaches, loss and corruption, ensuring your data remains secure and your business continues to operate smoothly.

Rest easy knowing that your data is safeguarded 24/7.
Peace of mind is powerful, and with Osmia's elite data protection services, it's assured.

Platform Services

We expertly manage, maintain and optimise all your critical systems, including software applications, operating systems, databases and middleware. Our proactive monitoring swiftly identifies and mitigates risks, ensuring minimal disruption.

Scaling your business? No problem. Our dynamic resource management seamlessly adjusts storage, computing power and bandwidth to meet your evolving needs. You can count on Osmia for platform excellence.

Network Management Services

Refine your entire network with continuous monitoring, proactive management and optimisation of your infrastructure, from hardware to security.

Our solutions ensure peak performance with real-time issue resolution and robust optimisation for both WAN and LAN, while expert VPN and wireless network management provide secure, reliable access for both remote and onsite teams.

Enjoy high availability, improved performance, efficient communication and 24/7 support. Start operating at your peak with Osmia.

Build business resiliency with state-of-the-art storage solutions

Unlock peak efficiency with Osmia's managed services. Experience seamless operations, streamlined IT and enhanced security.

Our team handles the tech so you can concentrate on what you do best.

Colocation

Forget the burden of building and maintaining your own facility. Osmia provides a secure, high-performance environment to meet your toughest demands.

Rent space, power, cooling and connectivity to reduce costs while ensuring top-tier security.

Why build your own infrastructure when you can access elite performance effortlessly? Our premier colocation services have your critical IT covered.

Storage Solutions

Osmia's scalable SAN, NAS and object storage effortlessly handles vast volumes of data to keep pace with your business growth.

With bulletproof security and exceptional performance, our storage options ensure your data is reliably protected – but always at your fingertips.

Trust Osmia to keep your data secure, optimised and accessible so you can focus on growing your business without compromise.

Private Servers

Our high-capacity servers keep your operations running, avoiding the headache of upkeep and investment.

Our team handles everything from hardware maintenance to software management, so you'll never have to. And with round-the-clock technical support, you can rest easy knowing that any issues will be dealt with swiftly.

Simplify your IT while staying in full control, with dedicated servers that never let you down.

OSMIA

Protect your business with secure, reliable IT solutions.
